

### Objective & Strategy

The strategy seeks long-term capital appreciation by participating in non-US equity markets. The strategy has the ability to invest in broad-market ETFs and in shares of companies that, in the manager's opinion, show greater potential for outperformance relative to their peers. The manager evaluates companies for inclusion in the portfolio using a framework that may incorporate fundamentals, the macroeconomic environment, technical indicators and corporate governance practices. Foreign markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments.
